Application No. 10/627,320

Amendment dated January 4, 2005

Reply to Office Action of October 5, 2004

This listing of claims will replace all prior versions, and listings, of claims in the

application:

**Listing of Claims**:

Clam 1-9 (canceled)

Claim 10 (previously presented) A method eliminating moisture from electronic

components, the method comprising:

storing electronic components in a storage area;

maintaining a warm and dry atmosphere in the storage area

by enclosing the storage area and injecting a warm and dry

gas into the storage area at a flow rate and temperature which

are controlled to eliminate moisture from the components in

the storage area; and

removing about 0.1% or more of the weight of the

components by elimination of moisture while the components

are stored in the storage area.

Claim 11 (original) The method of Claim 10, wherein the component storage area

is a feeder cart for storing the components.

Claim 12 (original) The method of Claim 10, wherein the component storage area

is a cabinet receiving at least one feeder cart for storing the components.

Claim 13 (original) The method of Claim 10, wherein the component

storage area is a storage cabinet for storing the components.

Claim 14 (original) The method of Claim 10, wherein the temperature control

system controls the temperature of the dry gas to about 10°C to about 60°C.

Application No. 10/627,320 Amendment dated January 4, 2005 Reply to Office Action of October 5, 2004

Claim 15 (original) The method of Claim 10, wherein the temperature control system controls the temperature of the dry gas to about 20°C to about 50°C.

Claim 16 (original) The method of Claim 10, wherein a flow rate of the dry gas delivered to the storage area is controlled by a control system including a humidity sensor within the component storage area.

Claim 17 (cancelled)
